Limnology in and around the alps

Job Offers

WASSERCLUSTER LUNZ INTERNATIONAL POSTDOC FELLOWSHIP PROGRAM

24 months fellowship for research in aquatic ecology and biogeochemistry at the WasserCluster Lunz (Austria)

Required documents can be downloaded from the WCL homepage:
<http://www.wcl.ac.at/>.

Deadline: **21 December 2015.**

PHD POSITION DEPARTMENT OF BIOLOGY, UNIVERSITY OF KONSTANZ

Molecular mechanisms of the repeated evolution of color patterns in cichlid fishes. Interested applicants can visit:
www.orn.mpg.de/2383/A application.

Contact:
claudius.kratochwil@uni-konstanz.de

Deadline: **15 January 2016**

Dear SIL-Austria members, dear LimnoAlp community, dear friends and colleagues,

We are pleased to WELCOME you to our new medium, which we hope brings our research and us closer together.

NEWS

New email address

To start with, we would very much encourage you to write to the LimnoAlp email address to communicate and share information on relevant topics that we will include to our newsletter:

limnoalp.news@gmail.com

For example, one topic is related to **Bachelor-, Master-, and/or PhD-theses or Post-doc research**: if you are looking for enthusiastic students to pursue their theses or post-doc research in your group/institution next spring or summer, please send us a brief description until **31.01.2016** and we spread such opportunities with the next newsletter.

Special issue Inland Waters

A special issue as an article collection on the topic "Connecting Limnological Research in and around the Alps" has been accepted by "Inland Waters" - the Journal of the International Society of Limnology.

Thanks to all the colleagues that sent a contribution! We sent the outline of potential topics and authors to the editor. This article collection is very promising and we are very happy about this opportunity to showcase our research activities in and around the Alps. Various research aspects and also future perspectives will be

SIL-Austria facebook page:

<https://www.facebook.com/groups/silaustralia/>

covered and this way we will get the opportunity to contribute also to the international field of limnology.

The editor will inform us soon about the timeline and deadline for submission. For now the possibility to send your contribution is still open, so you can still join and also invite your colleagues that are interested!

Editors for this special issue are Serena Rasconi (serena.rasconi@wcl.ac.at) Martin Kainz (Martin.Kainz@donau-uni.ac.at) and Bas Ibelings (Bastiaan.Ibelings@unige.ch). Please contact the editors if you need further information and we are looking forward to all your contribution (including authors and title)!

Website & Forum

We started the technical process (we found a host server and secured the domain). We also took care that there will be the opportunity to include our forum for discussions on the same website. Works are in progress and we can all contribute! We would like to thank Piet Spaak and SIL-Austria for their financial contribution.

Call for website pages

The idea is that every research center will have a dedicated page on the website, including information on research projects, available facilities, and available positions. You can elaborate your own webpage using very simple tools (e.g., power point) and sent it to LimnoAlp (limnoalp.news@gmail.com). We will then include it on the webpage. Please send us this information until **January 31, 2016**.

Call for forum topics

On the website we will host a forum in which specific topics, papers, methodologies, and much more can be discussed. It will be our virtual meeting place where students and scientists can ask questions and give answers. This forum will be open to everybody; all the society members and everybody who is interested can write and participate.

There will be no restrictions, all members can write and moderate topic of their interest. If you are interested in some topic and/or willing to be moderator for that on the forum, please send an email (limnoalp.news@gmail.com) and we will help you in opening a dedicated page on the forum itself.

Upcoming workshop & conferences

• XIV Subfossil Cladocera Workshop

5-8 April 2016 Levico Terme - Italy

Participants will learn and discuss methodological, taxonomical, and ecological aspects of subfossil Cladocera research, present their ongoing work, have microscope sessions and the occasion to transfer their experience and knowledge to young scientists.

For further information please contact:
Monica Tolotti: monica.tolotti@fmach.it
Manuela Milan: milan.manuela@gmail.com
or visit:

http://eventi.fmach.it/subfossil_cladocera

Deadline for abstract submission and registration: **20.01.2016**

• GLEON meeting

4-8 July 2016, Lunz am See - Austria

GLEON is a network of people, of about 30% are students, that connect lake observatories with research sites on more than 60 lakes across six continents and in 34 countries. Please visit:

<http://gleon.org/node/4463>.

Contacts: G18 Program Co-Chairs Martin Kainz (Martin.Kainz@donau-uni.ac.at) and Bas Ibelings (Bastiaan.Ibelings@unige.ch)

• SIL Torino

31 July - 5 August 2016 Torino – Italy

Deadline for special sessions is already closed, for further information, please visit: <http://www.sil2016.it/>

Deadline for abstract submission: **01.02.2016**

Deadline for early registration: **15.04.2016**
